II. MOBILIZATION OF LAND IN SUPPORT OF THE GREEN MOROCCO PLAN

As part of the public-private partnership, and in order to support the development of the agricultural sector, the Moroccan State has mobilized, since 2004, agricultural lands forming part of its State-owned land.

The goal assigned to this partnership is:

- Promotion of investment in the agricultural sector;
- Upgrading of the main agricultural sectors (fruit growing, market gardening, breeding, viticulture, olive growing...);

To do this, the approach adopted consists of:

- The provision of agricultural land for investors in the context of long-term leasing in order to allow significant profitability of projects;
- The contribution of entrepreneurs in the agricultural and agribusiness field in order to satisfy domestic and international demand.

The allocation of agricultural land to private operators is based on the Prime Minister's Circular No. 2/2007 of 29 January 2007 on the leases of agricultural land that is part of the State-owned land, as well as on Tenders Regulations.

Global data:

In the first half of 2018, 43 agreements were signed as part of the agricultural partnership covering an area of 3,925 ha, an overall investment of 519 million dirhams and the creation of 1,542 jobs over time.

Region	Agreements established	Surface area	Investment (dirhams)	Jobs
Beni Mellal-Khenifra	3	110ha 06a 29ca	23 419 053	68
Casablanca-Settat	8	139ha 35a 53ca	26 140 088	44
Fez-Meknes	10	305ha 79a 66ca	55 519 849	125
Oriental	6	392ha 83a 73ca	105 415 900	291
Marrakech-Safi	10	1002ha 16a 91ca	97 995 110	506
Rabat-Salé-Kenitra	3	140ha 60a 67ca	43 614 270	218
Tangier-Tetouan-Al Hoceima	3	1834ha 80a 45ca	185 452 252	290
Grand total	43	3925ha 63a 24ca	519 556 522	1.542

The Green Morocco Plan has adopted the plant production sectors including citrus, olive, vine, almond, dates, cereals, sugar and market gardening. For animal production, the sectors concerned are milk, sheep, beef and veal, poultry and apiculture.

The overall objectives of the Regional Agricultural Plan are to increase production levels, improve the quality and marketing conditions of this production and improve the levels of use of irrigation water. To support this approach, the National Pact for Industrial Emergence aims to set up aggressive sectoral plans for the national commodity sectors, notably meat and milk.

Breakdown by region:

The regional distribution of projects shows that 46% of projects are concentrated in the regions of Fez-Meknes and Marrakech-Safi, for an area of about 1307 Ha.
